

New recording of haulage data

After the successful implementation of our time slot management system at Capron for the registration of deliveries and collections of series materials, we want to expand this project to deliveries of chassis and vehicles soon.

One of the first steps in the planning process is to identify all haulage companies in the system.

Please fill in the fields below completely and send this form back to us as soon as possible to the following e-mail address Zeitfenstermanagement-fahrzeuglogistik@capron.eu.

We will send you an activation link, instruction material and further information to the e-mail addresses listed below. We will inform you in the right time before the start date.

Haulier

[Please enter your data directly into the form!]
